'Recent Activity' shows the content accessed by users on SpringerLink

Highlighted content

The screenshot shows the SpringerLink homepage. At the top right, there are links for 'Sign up / Log in', 'English', and 'Academic edition'. A search bar with a magnifying glass icon and a settings gear is located below the navigation. A horizontal menu contains 'Home', 'Books A-Z', 'Journals A-Z', 'Videos', and 'Librarians'. On the left, a 'Browse by discipline' sidebar lists various fields of study. The main content area features a large heading about providing access to scientific documents, followed by book covers for 'Cancer & Metabolism' and 'Next Generation Information Processing System'. A pink callout box states 'New books and journals are available every day.' Below this is a 'Recent Activity' section showing a list of articles and chapters with timestamps.

Search results are listed to the right, covering all content within SpringerLink by default.

Search results page

The screenshot shows the Springer Link search results page for the query 'related documents'. The page features a search bar at the top with the query 'related documents' and a 'New Search' button. Below the search bar, there are navigation links for 'Home' and 'Contact Us'. A yellow box indicates that 'Include Preview-Only content' is checked. The search results are displayed in a list format, with the first result being a Chapter titled 'Related documents' by Alan Mitchell, published in 1990. The second result is a Chapter titled 'Construction Related Documents' by John R. Clark, published in 1986. The third result is a Chapter and Conference Paper titled 'Linking Related Documents: Combining Tag Clouds and Search Queries' by Christoph Trattner and Denis Helic, published in 2010. The fourth result is an Article titled 'How many scientific papers are mentioned in policy-related documents? An empirical investigation using Web of Science and Altmetric data' by Robin Haunschild and Lutz Bornmann, published in 2017. The page also includes a 'Refine Your Search' section on the left with filters for Content Type, Discipline, Subdiscipline, and Language.

Abstract

Key message Major A₁ cytoplasm fertility restoration loci, *Rf*₂ and *Rf*₅, were found in the West African sorghum. A potential causative mutation for *Rf*₂ was identified. KASP markers were validated on independent material.

Abstract

Nodal root angle in sorghum influences vertical and horizontal root distribution in the soil profile and is thus relevant to drought adaptation. In this study, we report for the first time on the mapping of four QTL for nodal root angle (*qRA*) in sorghum, in addition to three QTL for root dry weight, two for shoot dry weight, and three for plant leaf area. Phenotyping was done
