INTRODUCTION

The **Central Library of MNIT Jaipur** is one of the best and richest hybrid libraries in the country. To fulfil the academic needs of the users, the library keeps on updating and adding all types of resources to its collection and eBooks are one of the very essential and important resources for any library.

EBooks are essential to libraries for several reasons:

➡EBooks can be accessed comfortably even while travelling without any hassles of carrying hard books.

➡ Users can carry hundreds of books anywhere they go. Moreover e-books are stored in the reader's online personal account.

➡E-books are available with "search option" and hence they can easily look up for any information instead of wasting time turning page after page. One can also bookmark the page after search.

➡Most of the e-books are cloud based. Hence writers or authors can update the contents online immediately. Due to this, readers can access updated content online. The process avoids investment on re-printing costs and saves time.

➡E-books are equipped with interactive elements for better reading experience. These contain audio, video and animations which are ideal for children's and visually impaired people.

➡External links or Hyperlinks are added with e-books for extra information and other references.

➡In printed book publishing, author has to go through many challenges to get right agent and publishing deals. E-book publishing is very easy, fast and less time consuming. Amazon's "kindle Direct Publishing" is one such example.

Following all the measures and transparency, a total of **432 No. of titles** of eBook were purchased and a total amount of **Rs. 75,27,011.00/- (Seventy five lakhs twenty seven thousand and eleven rupees only)** was spent.
