INTRODUCTION

The **Central Library of MNIT Jaipur** is one of the best and richest hybrid libraries in the country. To fulfil the academic needs of the users, the library keeps on updating and adding all types of resources to its collection. And print books are one of the very essential and important resources for any library.

Print book collections are essential to libraries for several reasons:

- **Access to information:** Libraries serve as a repository of knowledge, and print books are a vital source of information that provides access to a diverse range of perspectives and ideas.
- **Preservation of cultural heritage:** Print books are an important part of our cultural heritage, and libraries serve as custodians of this heritage by preserving and maintaining print book collections for future generations.
- **Academic research:** Many academic fields still rely heavily on print books as a primary source of information. Print books offer a level of depth and detail that cannot be found in digital resources.
- **Reading experience:** The tactile experience of reading a physical book is still valued by many readers, and the presence of print books in a library provides a welcoming and familiar environment for readers.
- **Digital divide:** Not everyone has access to digital resources or devices, and print books offer an important alternative for those who cannot access digital resources.

In summary, print book collections are essential to the function of libraries and serve as a crucial resource for knowledge, research, preservation, and access.

Following all the measures and transparency, a total of **1674 No. of titles with 2428 No.** of copies of Indian & foreign print books were purchased and a total amount of **Rs-57,22,487.00/-** was spent.
